

# How much adaptivity is enough?

PandaDoc experience

**About company** & its journey

PandaDoc **Org design** evolution

How much **adaptivity** is enough?

# Agenda

# Speakers' Bio

**Denis Salnikov**

Head of Agile Practices

**Alena Hlekava**

Head of Agile Practices

**Both based in  
Krakow,  
Poland**

**Both are  
Certified LeSS  
practitioners**

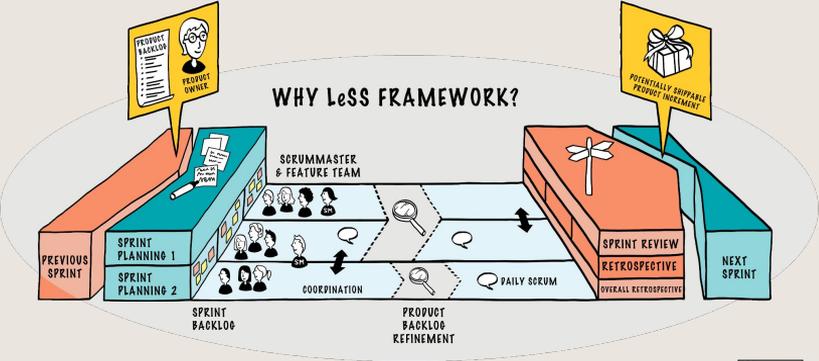

**Both are at  
PandaDoc for  
2,5+ years**

**How many LeSS frameworks are there?**

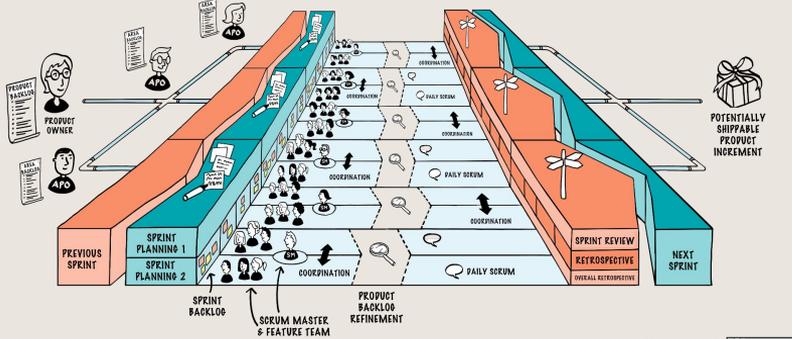

# There are two LeSS Frameworks

<http://less.works> BY-ND

# LeSS

<http://less.works> BY-ND

# LeSS Huge

# About the company & its journey

Part I

# About PandaDoc

More than 52,000 customers  
in 130 countries

Started as QuoteRoller in 2011, **pivoted to PandaDoc in 2013** as a leading document workflow automation and electronic signing software

Reached a **\$1B evaluation** and has officially become a "unicorn" during the Series C in 2021

# PandaDoc Today

**800** ✨

**Employees** around the globe

**350**

in **Product & Engineering**  
(R&D)

**50**

**Teams**, the majority  
being Feature teams

# PandaDoc Org Design Evolution

Part II

# When Panda was less huge

All teams were **co-located**, all being component teams

Started with **8 teams** working on a single Product Backlog

**LeSS Flip preparation** started in late 2019

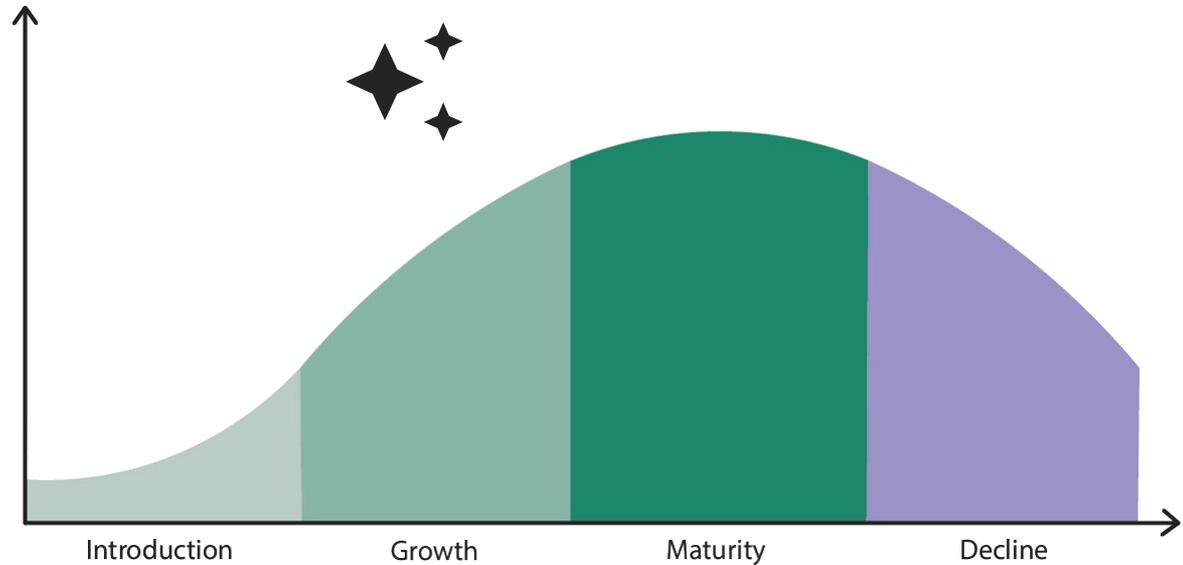

**CTO and a co-founder** has been appointed as the PO

# Business Lifecycle

We will use **the Business Lifecycle** concept to map different stages

Please remember: **“All models are wrong, but some are useful.”**

BLUEPRINT 1

# Early Growth stage

State of PandaDoc  
in early 2021

# Driving ideas at the Early Growth stage

**Each Requirement Area focuses on a specific ICP**

**Area Product Owners were introduced**

**Teams are the minimal feasible Org building block**

**Each area requires a set of leadership roles**

# RA Self-design Workshop

## Growth

Tanya Aulachynskaya Alexei Maistrenko Aksana Khilko

Alesia Shilova Liudmila Kurbatskaya Anna Werigo

Quota: 2 PY teams

Spirit

Mooncake

Rocket

Dream

## Application Core

Mike Korenuzin Maks Zhylytskiy Katerina Leonchikova Darya Sobal

Liza Gatsak Sergey Keller Eugenia Chul Dima Khrolovich Lena Glekova Alexei Pashkevich

Quota: 6 teams (4 PT + 2 JAVA)

Cook

NotIntegrations

Monads

Discovery

Split Happens

Hedonists

## Solutions

Nikita Martynov Mick Amelishko Denis Savosin Anastasiya Pisarevskaya

Tatiana Sialitskaya Evgeniy Laburnskiy

Quota: 4 teams (2PT + 2 JAVA)

Yadro

Lucky

Solit

Easy

Eleven

## API & Integrations

Brad Andrews Yuri Losinets Sergei Plevko Anastasiya Pisarevskaya

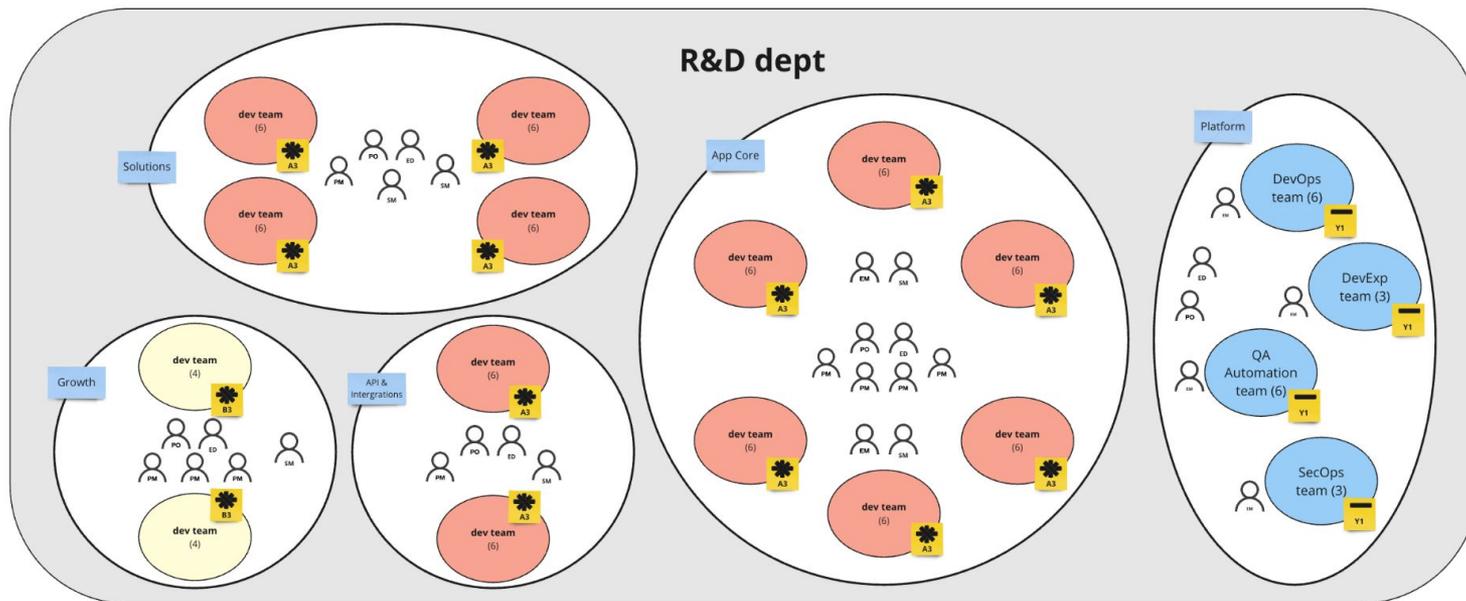

Scott Blodeau Olya Horbatiuk

Quota: 2 teams (1PT + 1 JAVA)

New Team

# Blueprint 1: Early 2021

sales dept

marketing dept

customer success dept

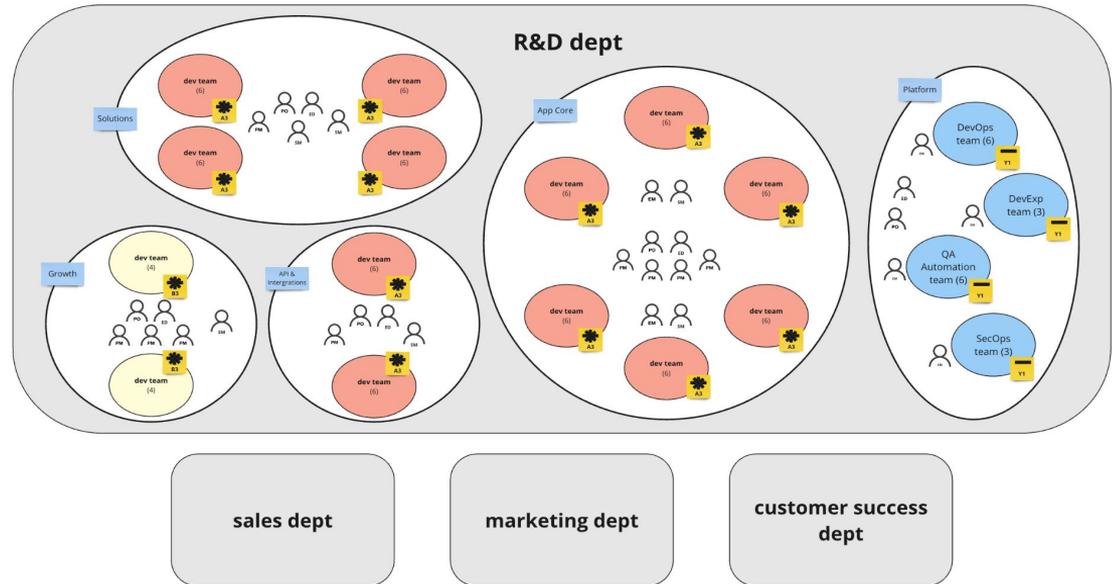

# Facts & Numbers mid 2021

**18 teams organized** in 5  
Requirement Areas

**Platform RA was introduced** with  
component teams onboard

**R&D has grown to 150%** (from  
12 to 18 teams)

**Area has a set of assigned roles**  
(eg APO, Director of Engineering,  
Head of Design, Engineering  
Managers,, Product Managers,  
Scrum Masters)

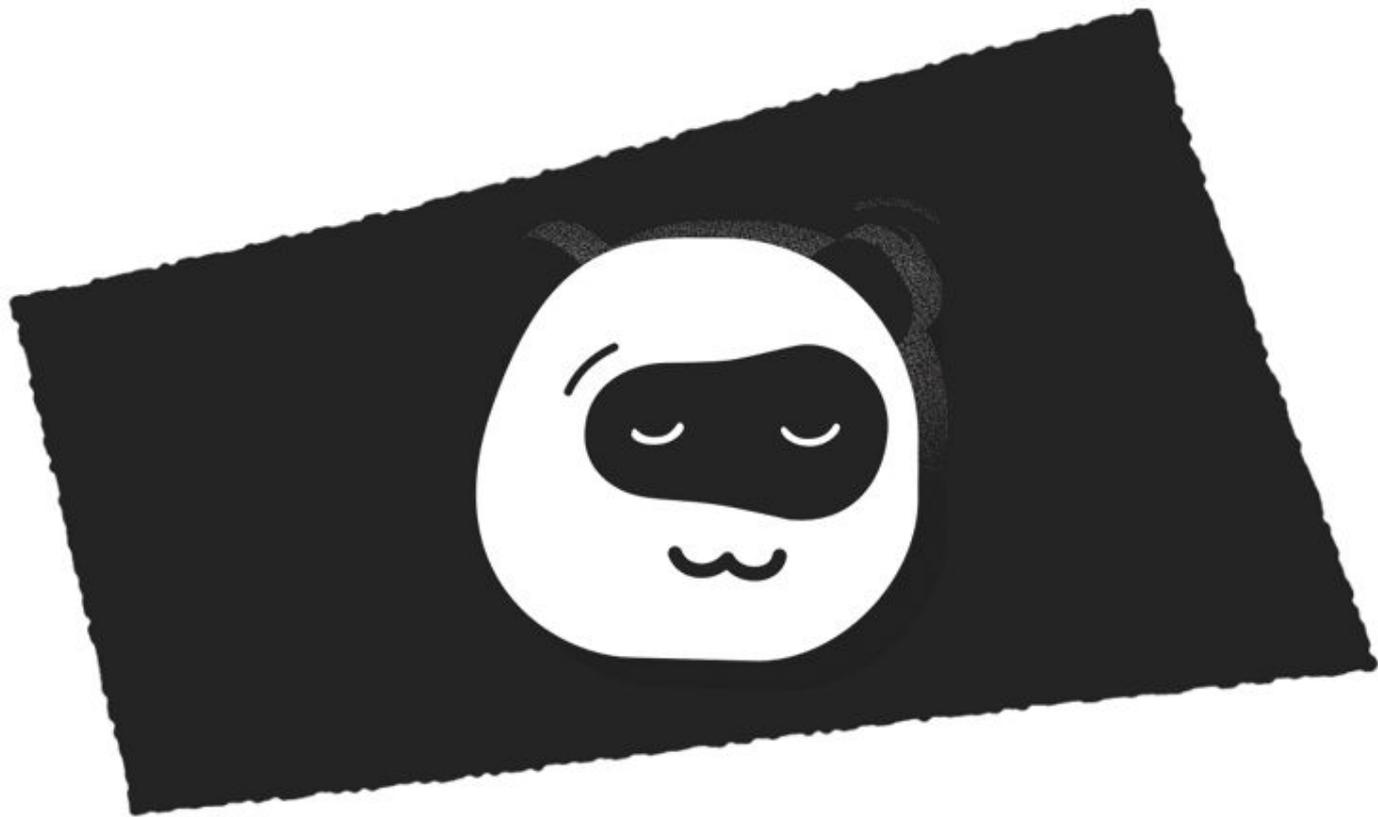

**BLUEPRINT 2**

# **(Hyper) Growth stage**

State of PandaDoc  
in mid 2021 - 2022

# Driving ideas at the (Hyper) Growth stage

**Product Owner  
operates on the  
level of investments**

**Validation of new  
Hypothesis happens  
in Incubation**

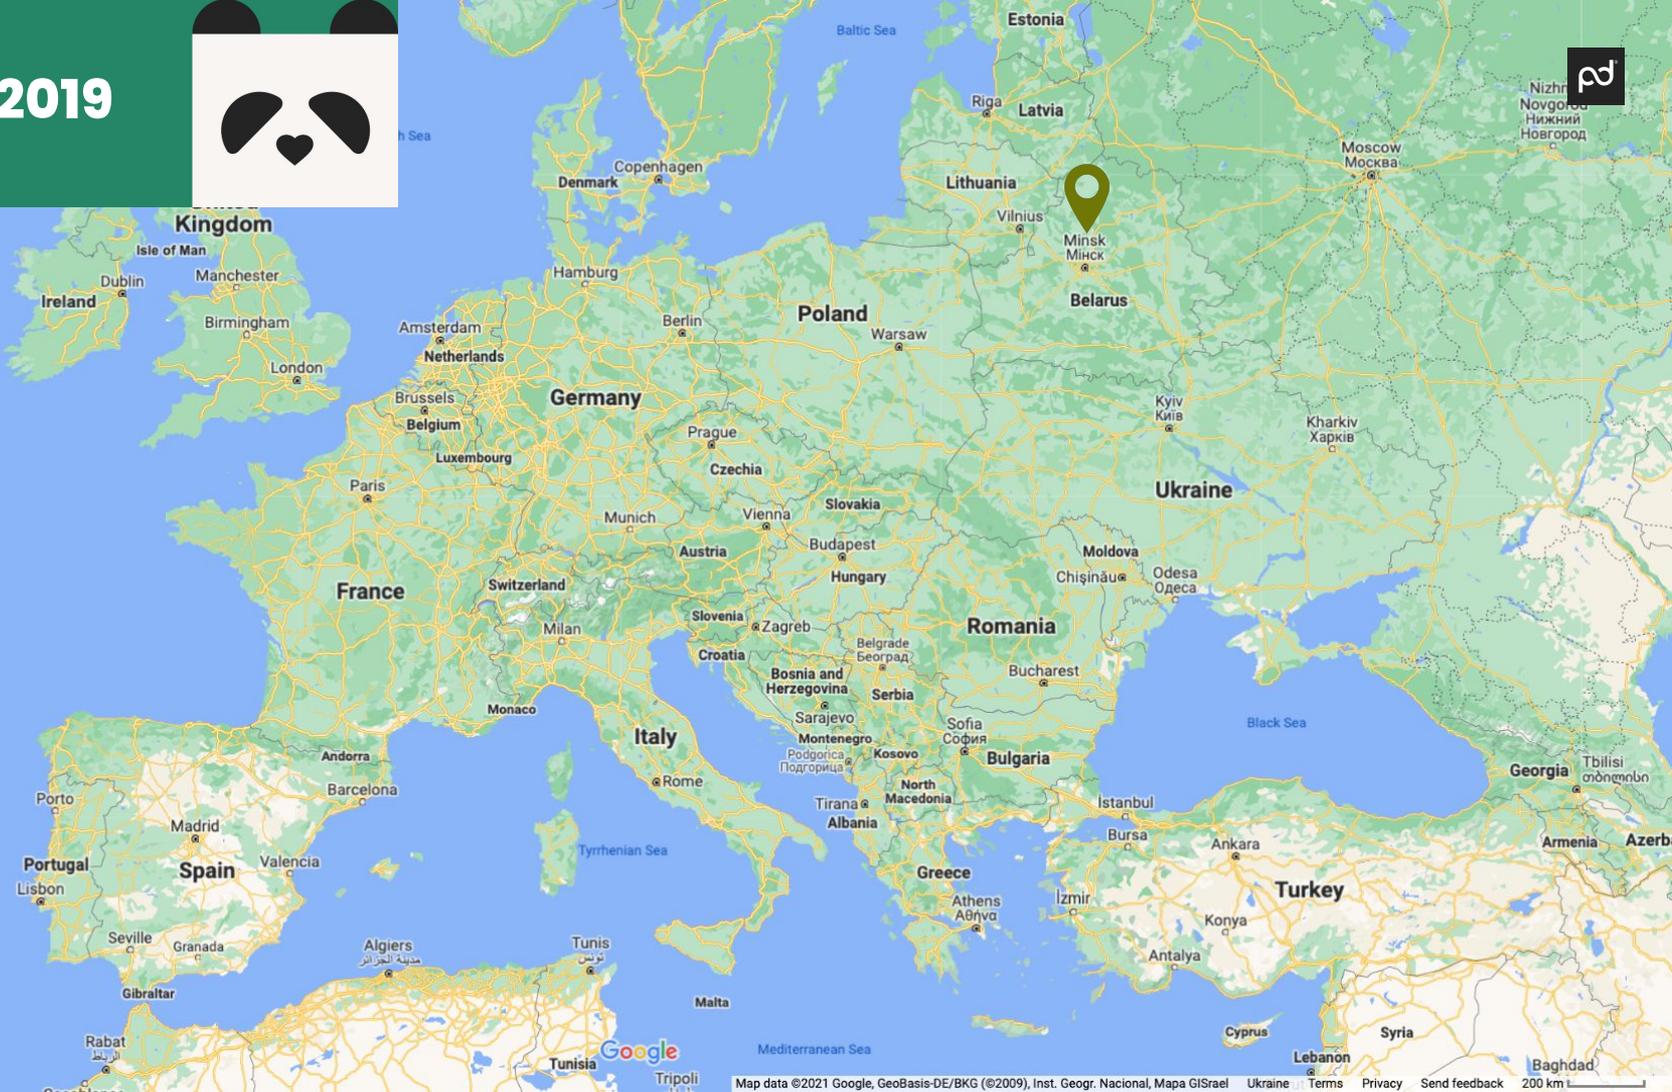

**Self-replicating  
("copy-paste")  
Org Design**

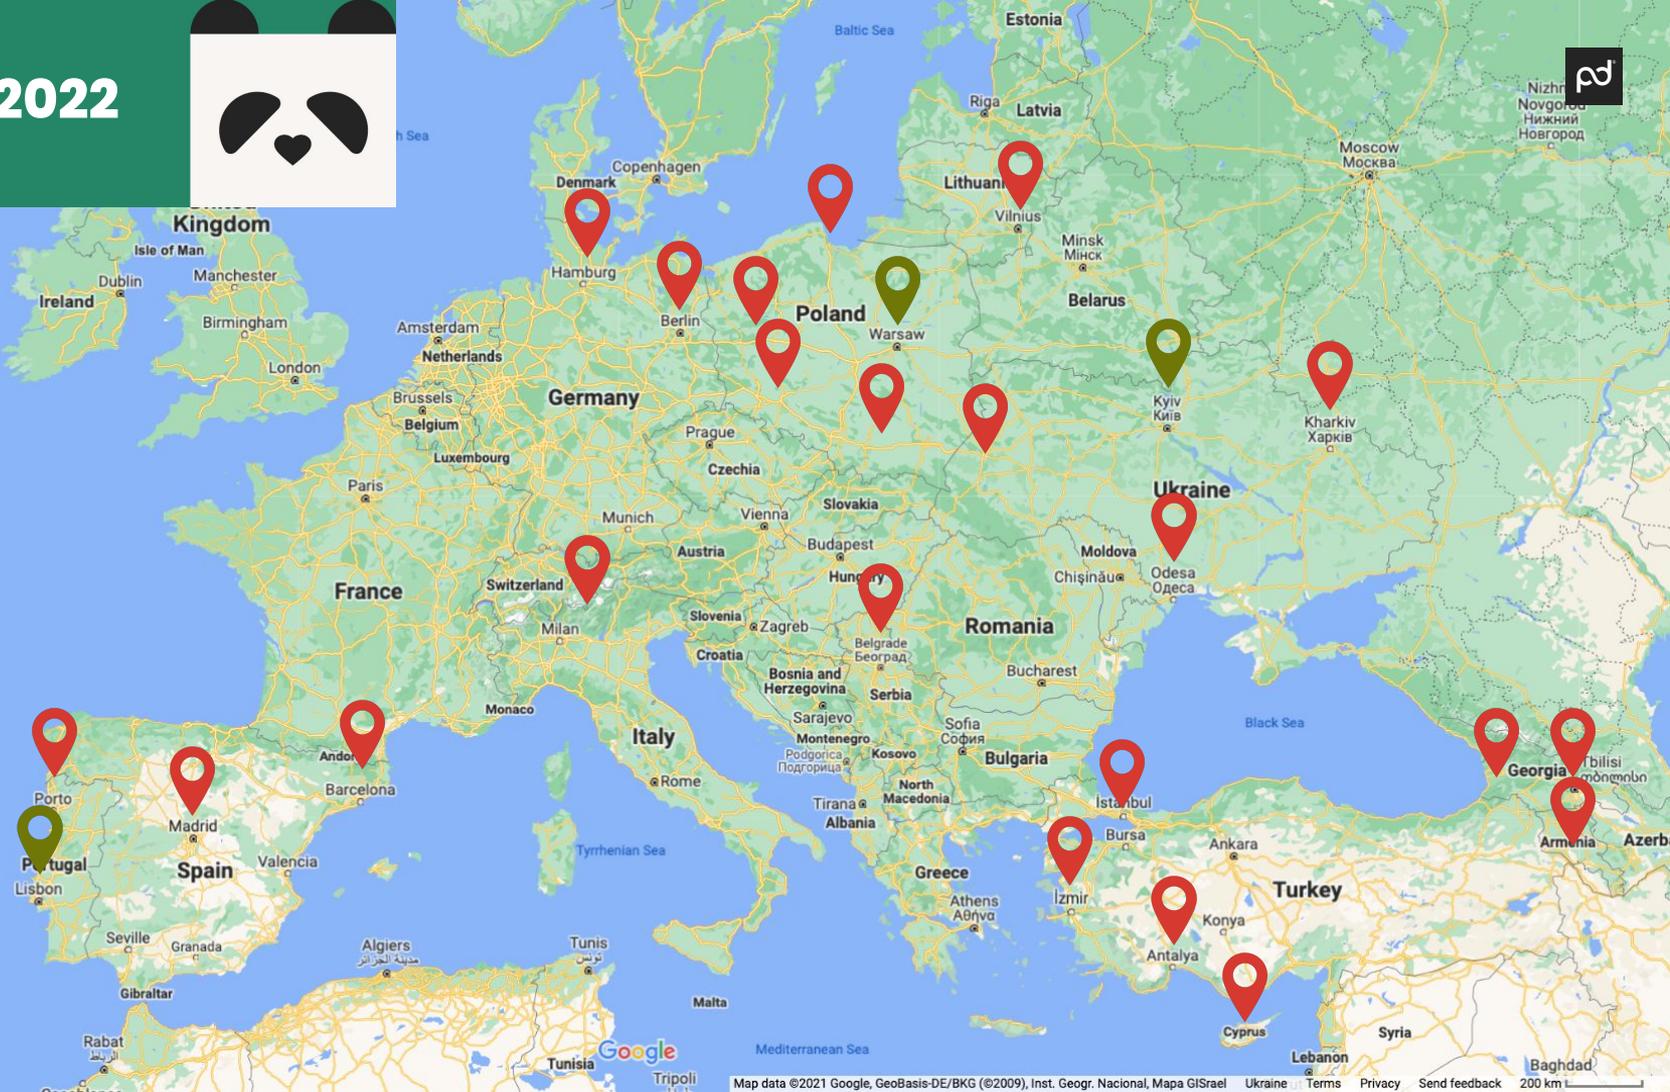

**Employees  
Safety and hiring  
for Cultural Fit**

# R&D in 2019

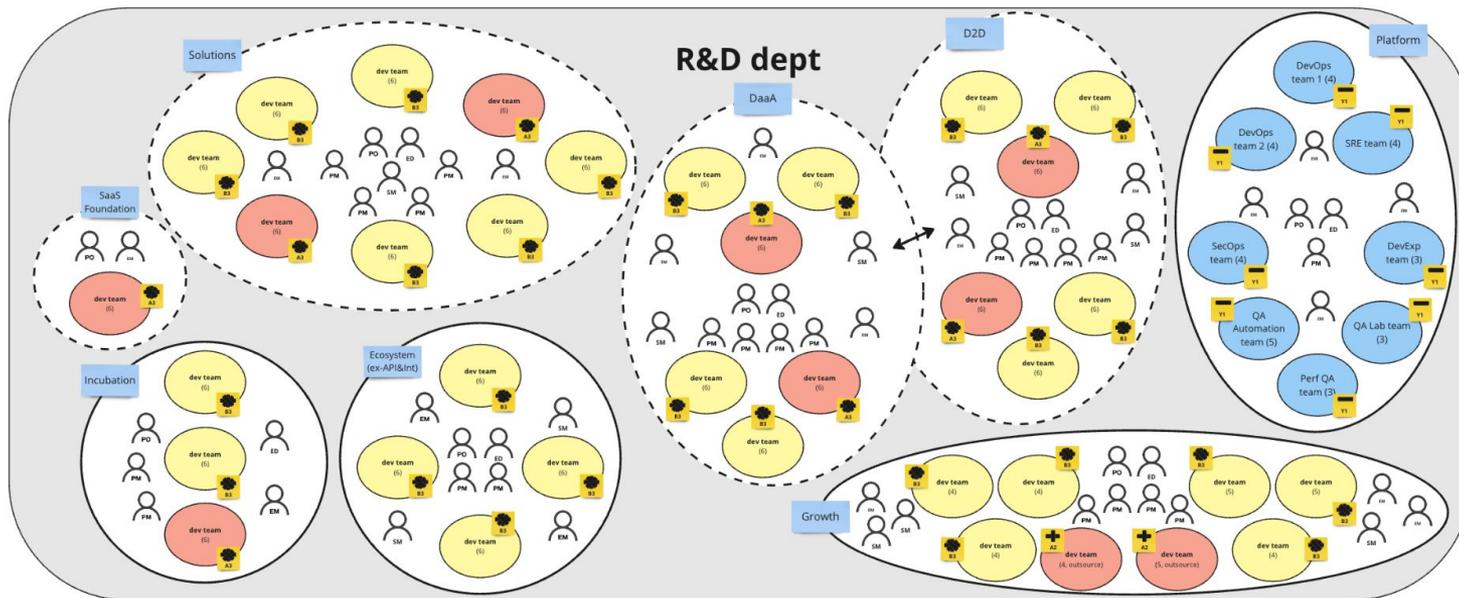

# R&D in 2022

# Many Pandas around the Globe

# Blueprint 2: Late 2022

sales dept

marketing dept

customer success dept

learning & development dept (4)

# Facts & Numbers late 2022

● **\$1B evaluation** during the Series C

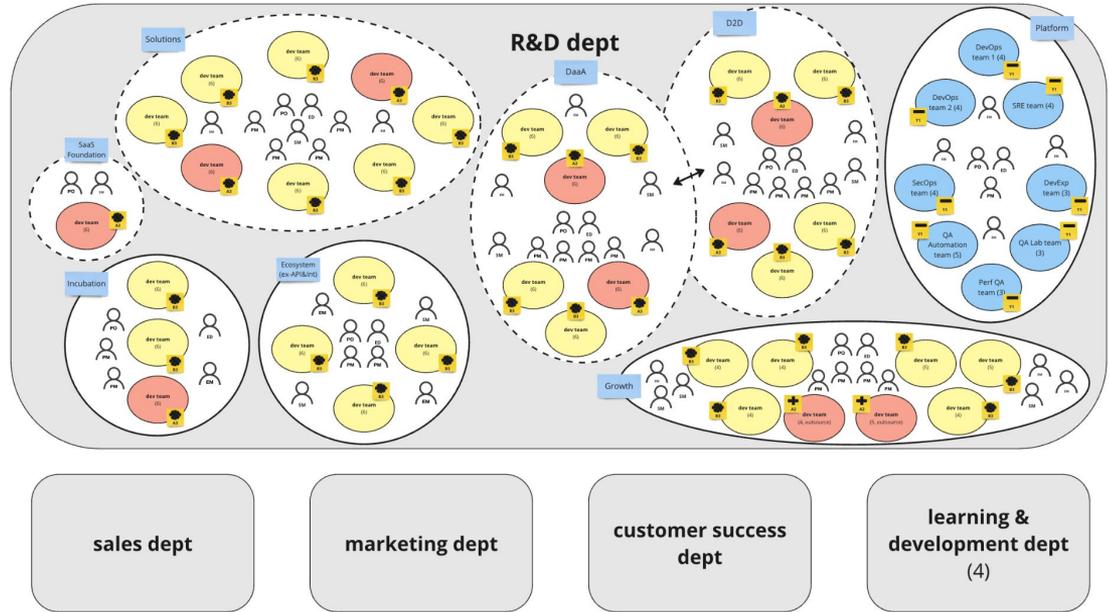

● **R&D growth rate** in 2021-22 was 400%

● **Opened offices** in Kyiv (UA), Lisbon (PT) and Warsaw (PL)

● **Switched to remote-first mode**, supported a mass relocation

● **Multicultural environment** with new employees from Portugal & Poland

● Ended 2022 with **8 RAs & 48 teams**

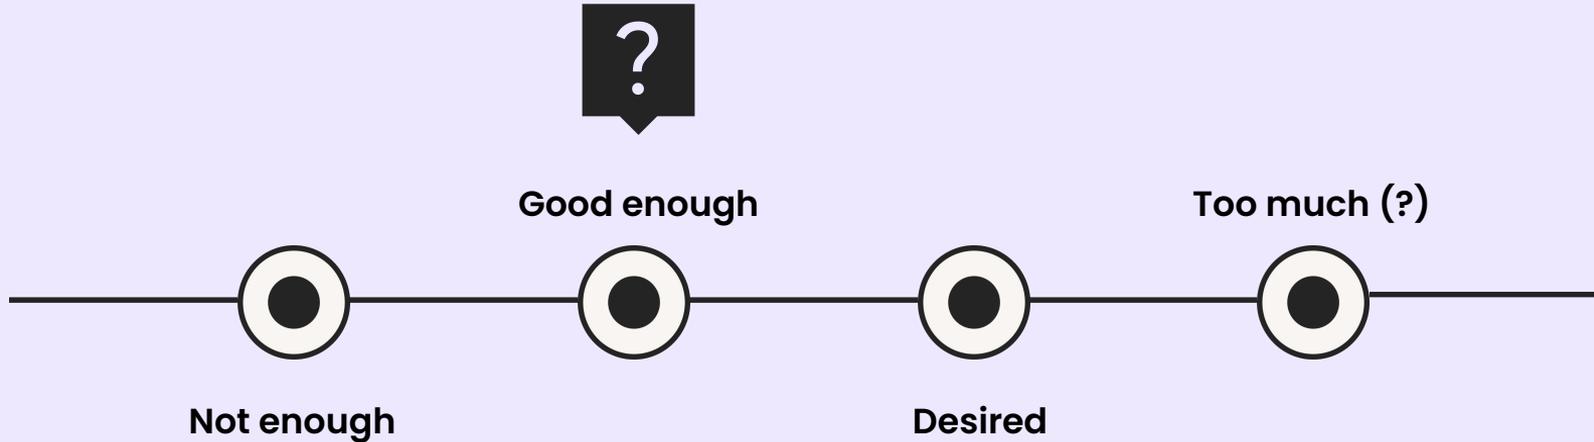

**BLUEPRINT 3**

# Maturation stage

State of PandaDoc  
as of mid 2023

# What's our target Adaptivity?

# Driving ideas at the Maturation stage

**Less specialization,  
more value**

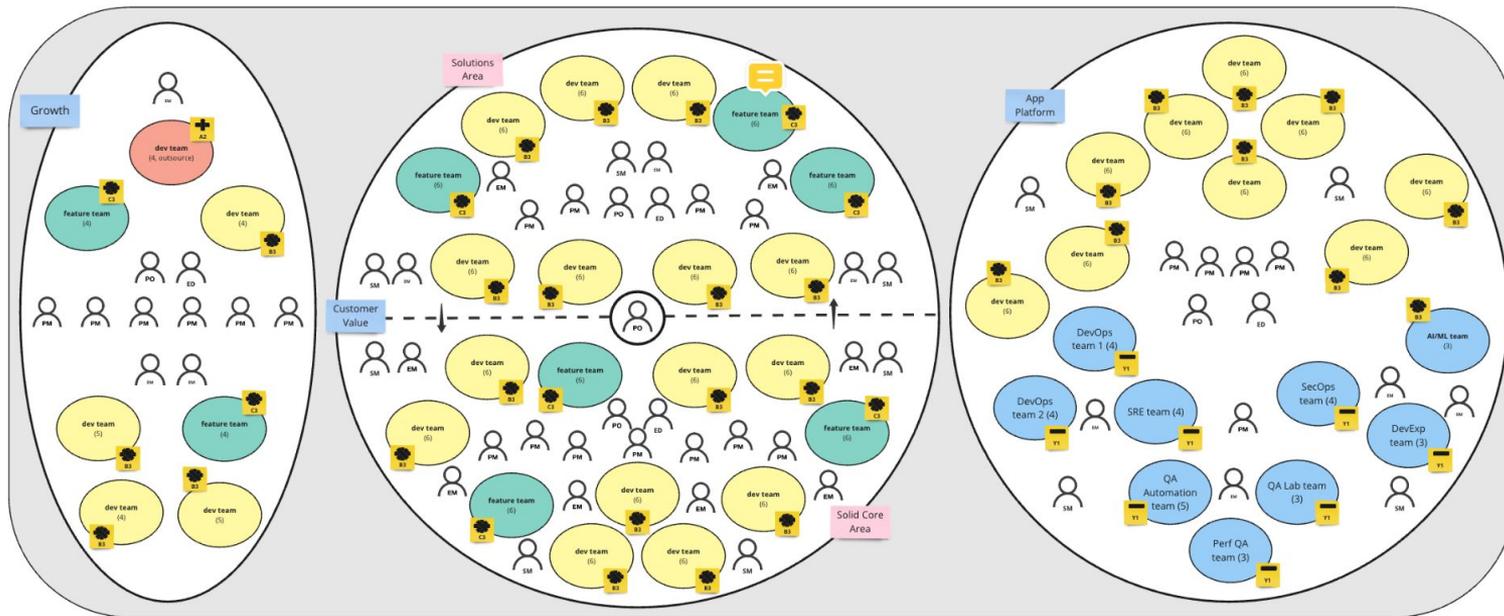

**Separating  
structures from  
people**

**Different Areas  
may have different  
optimisation goals**

**Addressing  
accumulated  
system fatigue**

# Blueprint 3: early 2023

**sales dept**  
(?)

**marketing dept**  
(?)

**customer success dept**  
(?)

**learning & development dept**  
(4)

# Facts & Numbers early 2023

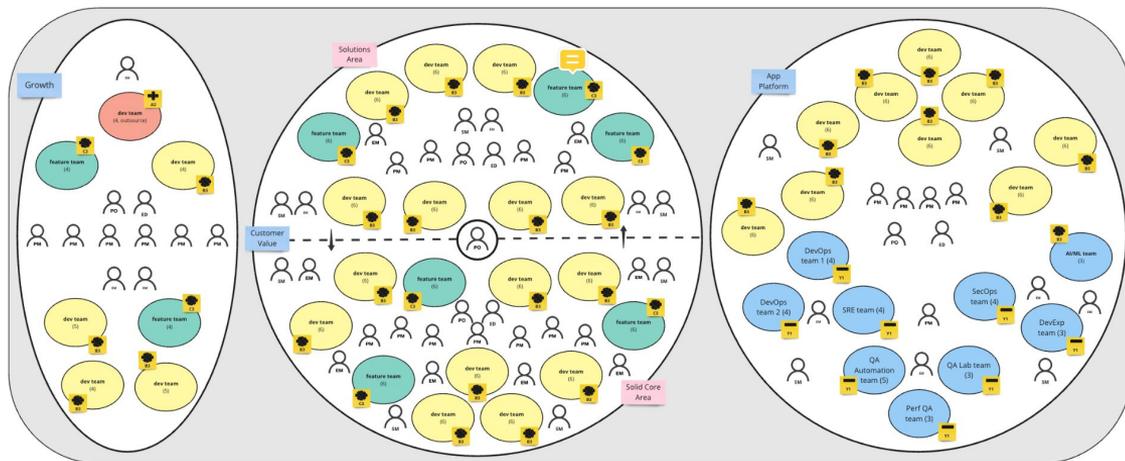

8 Requirement Areas **merged**  
**into 3**

Customer Value RA consists of **2**  
**sub-areas** (Solutions and Core)

Platform RA's Component Teams  
**joined the App Platform RA**

Each Requirement Area has **its**  
**own Optimization Goal**

Further **growth is not planned**  
(as of now)

# How much Adaptivity is enough?

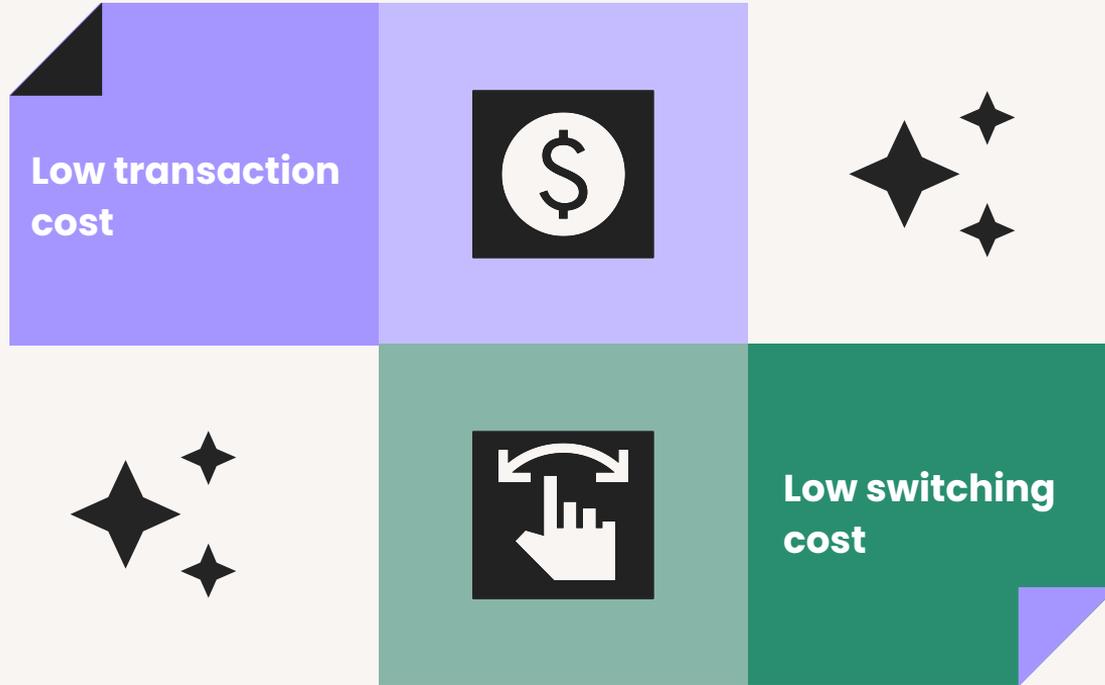

Part III

# The biggest RA as a Sandbox

# What does it mean to be adaptive?

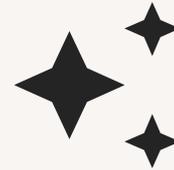

# Do we pay enough attention?

**Low transaction cost**

**App Platform RA enables other RAs** by providing key functionalities used across the experiences

**Ongoing Change initiatives** (eg test automation)

**Optimizing Transaction Cost** as an optimization goal

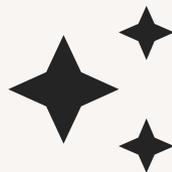

# What about the other part?

Have we **ever measured** this?

What if we need much **lower switching cost** to reach our goals?

Are we **good enough** here?

**Low switching cost**

# One more Reason

## Concern for deteriorating Adaptivity

multiple explicit, implicit  
backlogs >>

% of total product items  
a team knows well >>

adaptiveness of teams  
to change direction at  
global level

# How did we measure the Switching Cost?

## Introduction

The purpose of this document is to show how the transition of Team Lucky was made from the [redacted]. Based on this document, I'd like to have several points to discuss:

- Switching Cost (are we satisfied with it or not)
- Learnings on how to make next transitions smoother and more effective

## Switching Cost

In this part, I will describe step by step, what action we've taken since the decision was made till the first commit of the Team, and to the achievement of the Sprint Goal.

Date	Action	Results
31.01.2023	The public announcement was made on plans to pause [redacted] and start doing [redacted]	<ul style="list-style-type: none"> <li>• The team got presented with the decision</li> </ul>
01.02.2023	Veronika (PM) got introduced to the Team at the Daily and had an initial discussion	<ul style="list-style-type: none"> <li>• The team has collected their concerns in a <a href="#">thread</a></li> </ul>
15.02.2023	First PBR of the topic	<ul style="list-style-type: none"> <li>• Preliminary discussion without details or UI</li> </ul>
22.02.2023	Second PBR of the topic Veronika and Katya brought the PBR with the team for the first time	<ul style="list-style-type: none"> <li>• The team gave a preliminary estimate for the scope based on the presented UI designs</li> <li>• The team and PM agreed to have more transparency around [redacted]</li> </ul>

Detailed **Notes**

**Team Perspective**

Trigger point = **Investment decision**

**Milestones** = 1st PBR, 1st Commit, 1st Achieved Sprint Goal

Wrapping up point = 1-2 Sprints after the 1st Commit

**What is your best guess about our results?**

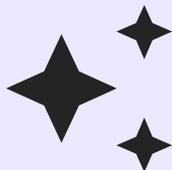

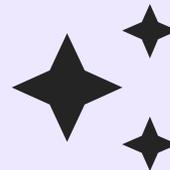

# The Result

**Switching  
cost**

**14,75**

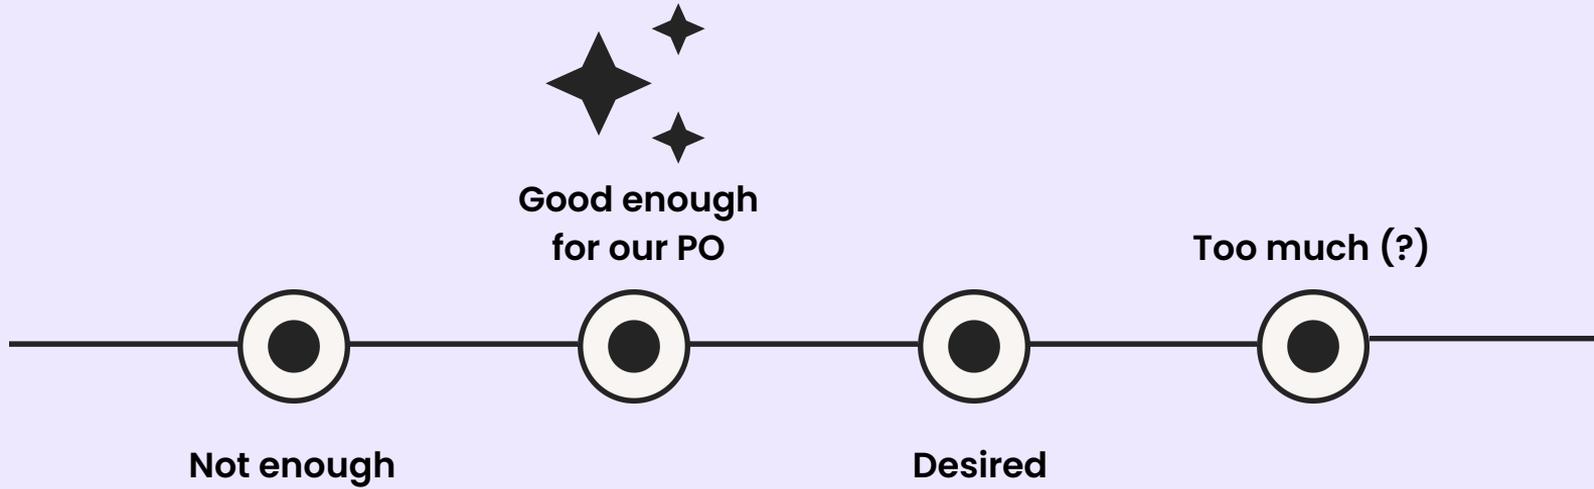

working days  
from 1st PBR to  
**first Commit**

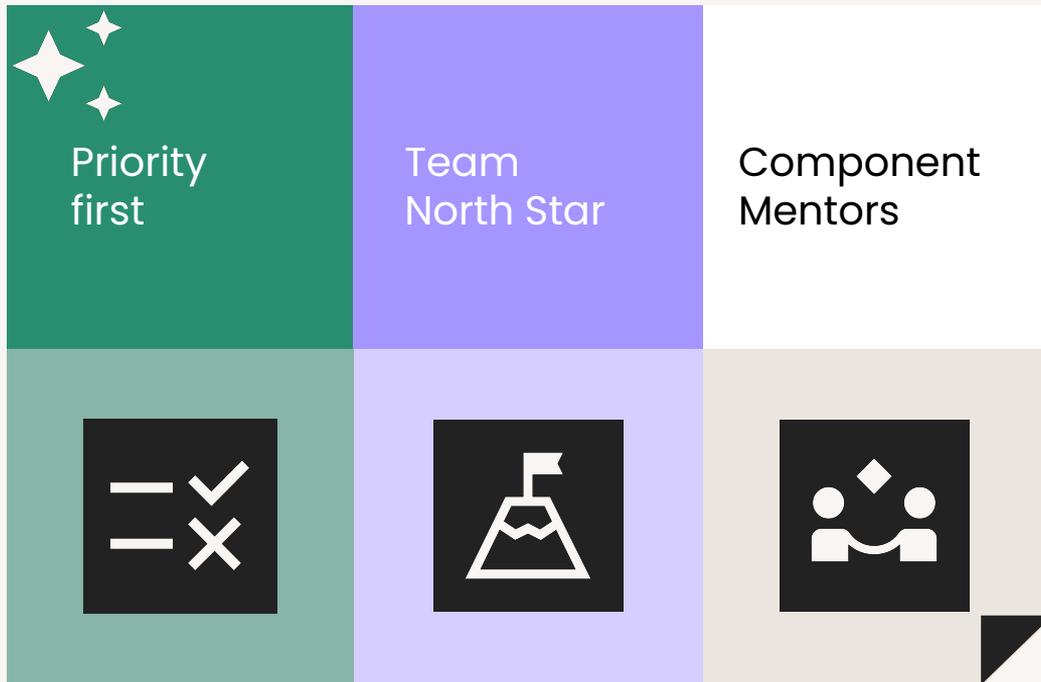

Expect the 1st  
commit in the  
**second Sprint**

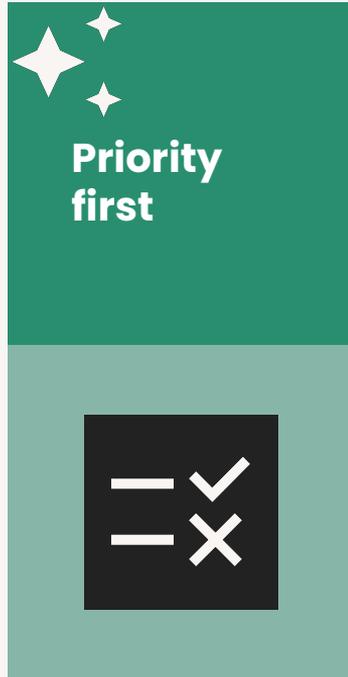

# So what?

# What helps us to keep up and improve?

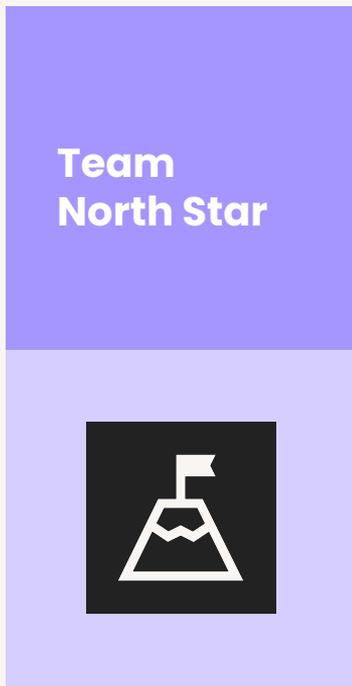

# Priority first Principle

- **PO reviews investment** via Q investment thesis, APOs review investment via Area Product Backlog every Sprint
- Once investment is paused/stopped Team picks up the highest priority item >> # of domains team is working per year >> **learning the product and staying in shape to switch domains**
- Mental model: We want to work on high-priority items, **it's ok for a team to spend time on learning** before starting to commit

# Team North Star model

- Team **self-assessment** 
- Supports in setting expectations by providing **ideal state**
- Helps to **identify and address gaps**
- **Whole-product focus**, multi-learning, refinement, etc.

# Component Mentors

## Component Mentors

Rules, **guidelines**

**Consulting**

**Tech Solution review**, Code review

**So how much adaptivity is enough?**

# Guess what

**It depends**

# Guess what

**It depends**

Needed level of adaptivity to  
**enable your company goals  
and better ROI**

# Guess what

**It depends**

Needed level of adaptivity to  
**enable your company goals  
and better ROI**

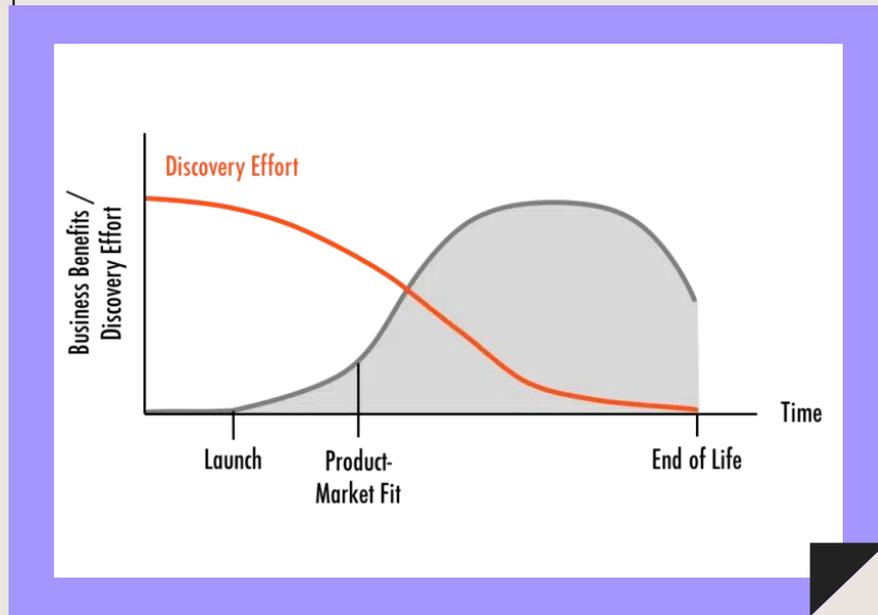

**Product Life Cycle** stage

# Discovery Effort and PLC

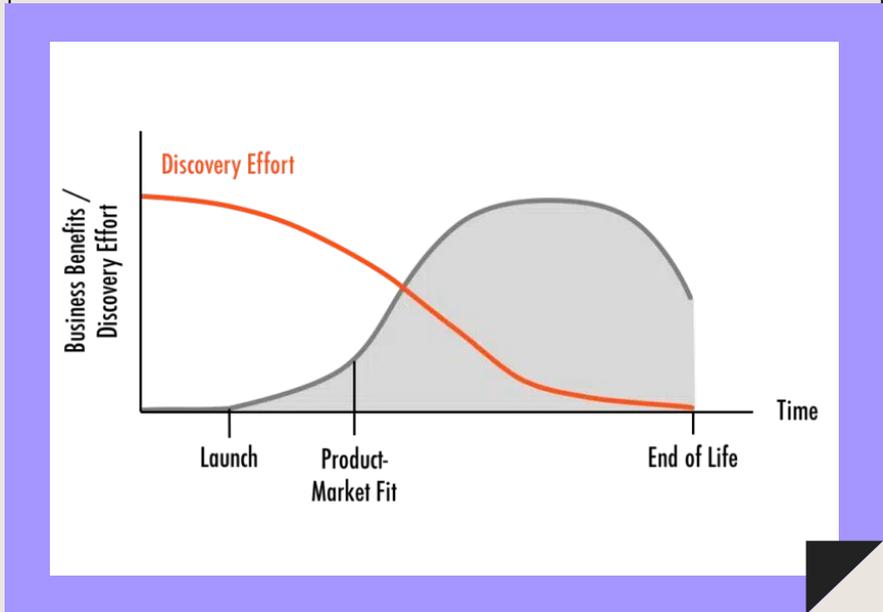

Typical trend of time & effort invested in the Discovery **in a mature Product**

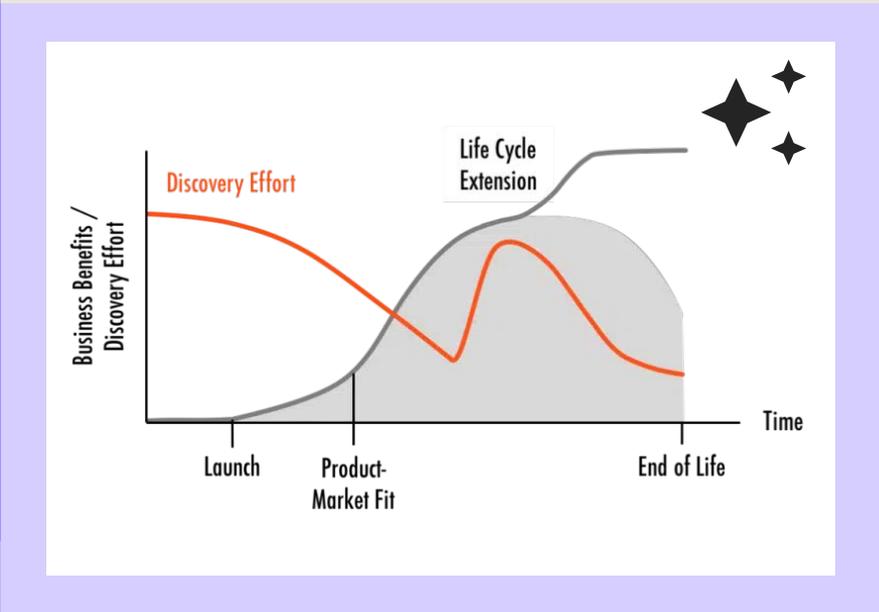

Source: <https://www.romanpichler.com/blog/how-much-product-discovery-is-necessary/>

# Discovery Effort and PLC

Typical trend of time & effort invested in the Discovery **in a mature Product**

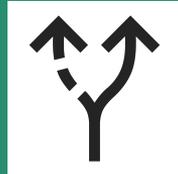

Time & effort invested in the Discovery **aimed at a Product's Life Cycle extension**

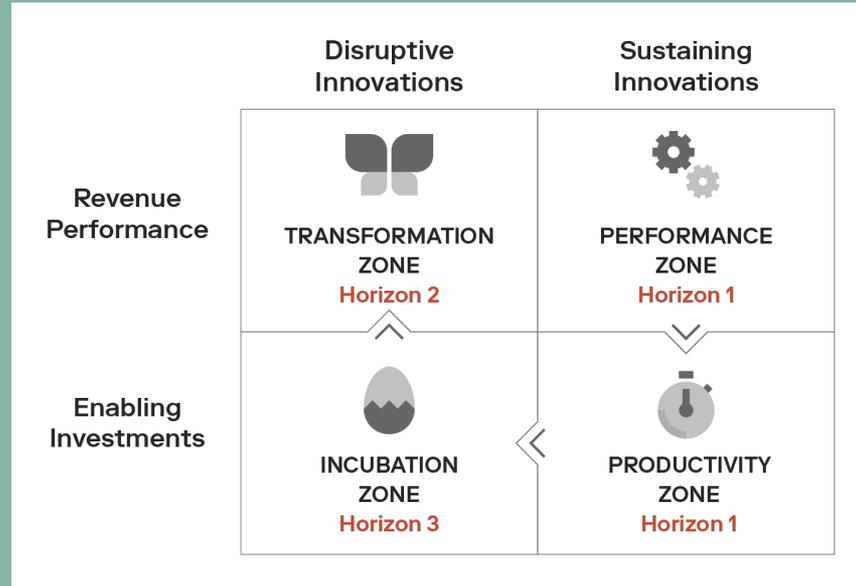

Source: <https://www.romanpichler.com/blog/how-much-product-discovery-is-necessary/>

# Incubations Area

The purpose of the Incubation is to uncover **new revenue streams**

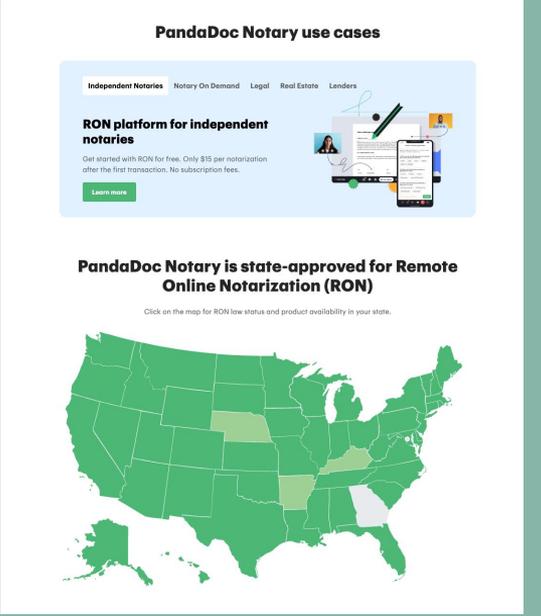

It operates in a **VC-like style**

Source: "Zones to Win: Organizing to Compete in an Age of Disruption", G.Moore

# Incubations Success Case

**PandaDoc Notary use cases**

Independent Notaries Notary On Demand Legal Real Estate Lenders

**RON platform for independent notaries**

Get started with RON for free. Only \$15 per notarization after the first transaction. No subscription fees.

[Learn more](#)

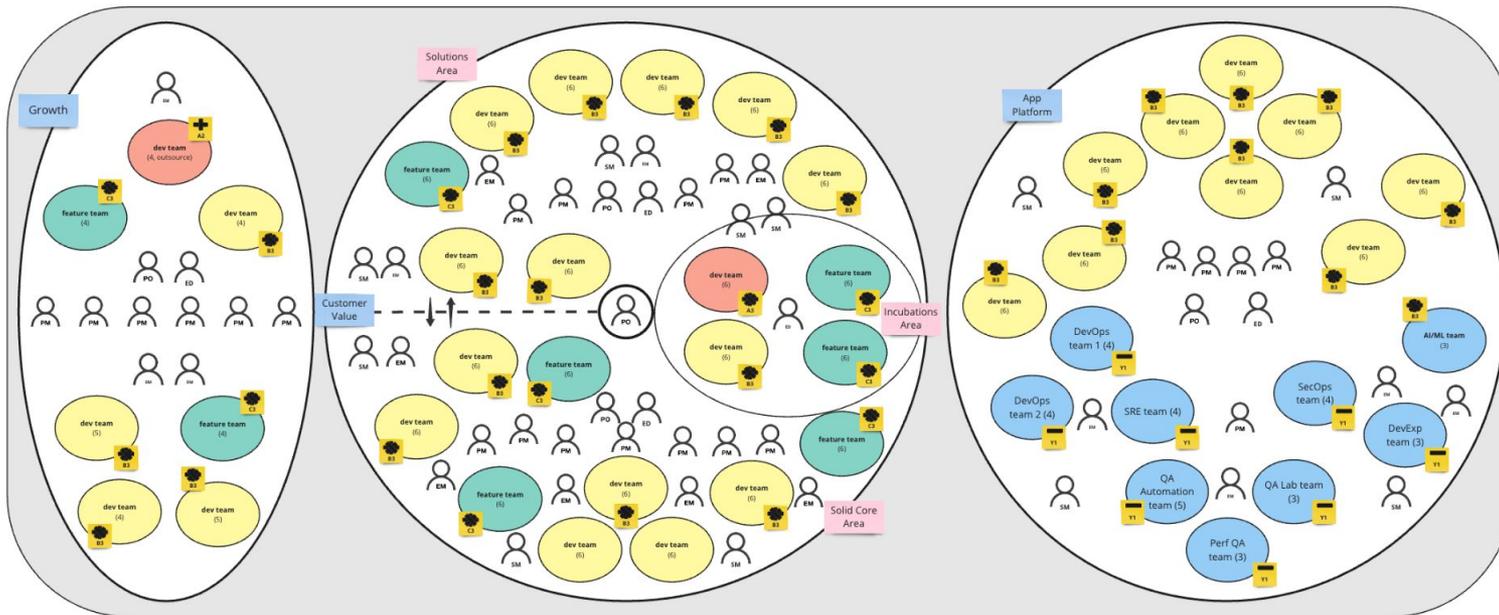

**PandaDoc Notary is state-approved for Remote Online Notarization (RON)**

Click on the map for RON law status and product availability in your state.

- Available across **forty seven (47) U.S. states**
- Multiple hundred **monthly active users (MAU)**
- Thousands of **notarizations per month**
- Solid **Product-Market Fit**

learning &  
development dept  
(4)

# Today's Driving Ideas

**PO still operates on the level of investments**

**Teams move following the investment**

**Structure is separated from people**

**Key area for Lead time improvement is Discovery**

# Lessons learned and Calls to action

Treat your **org design as a means to achieve your business goals**, change it if needed

**Don't be afraid of asking "existential" questions**, it brings a lot of insights

**Adaptivity is a continuum**, know your good enough and desired level

# What is coming next for PandaDoc?

**Data-driven process  
improvement**

**Multi-app  
Experience**

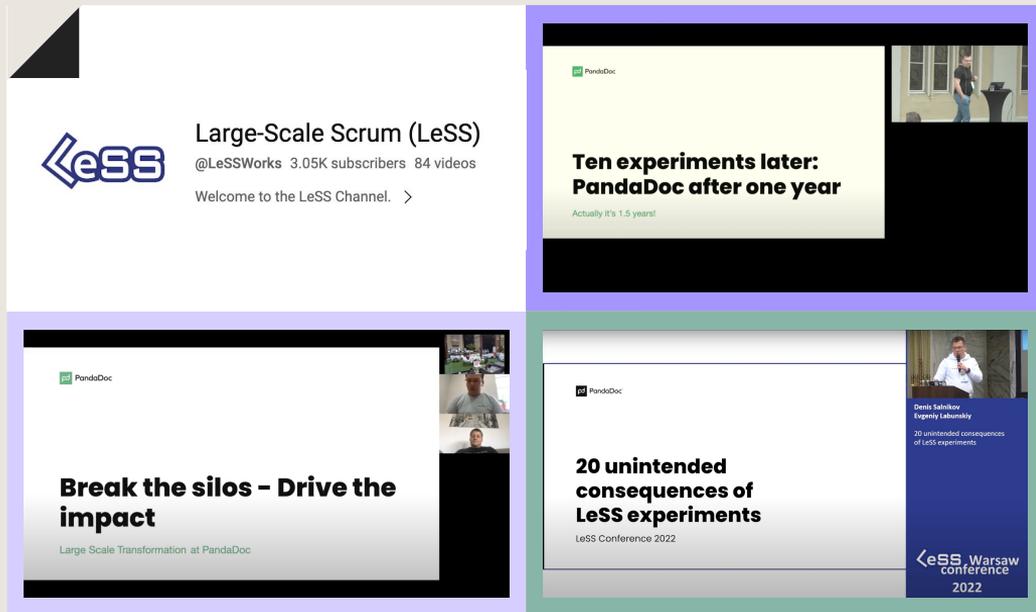

**Even more  
Experiments**

# PandaDoc Journey with LeSS (Huge)

More insights on the PandaDoc journey at the official **LeSS YouTube channel**

Source: LeSS YouTube channel

**Questions?**

That's a wrap.

# Thank You!
